

## WORKSHEET – 1.2

---

**AIM:** You need to develop one website according to your choice by using any open platform for example WIX

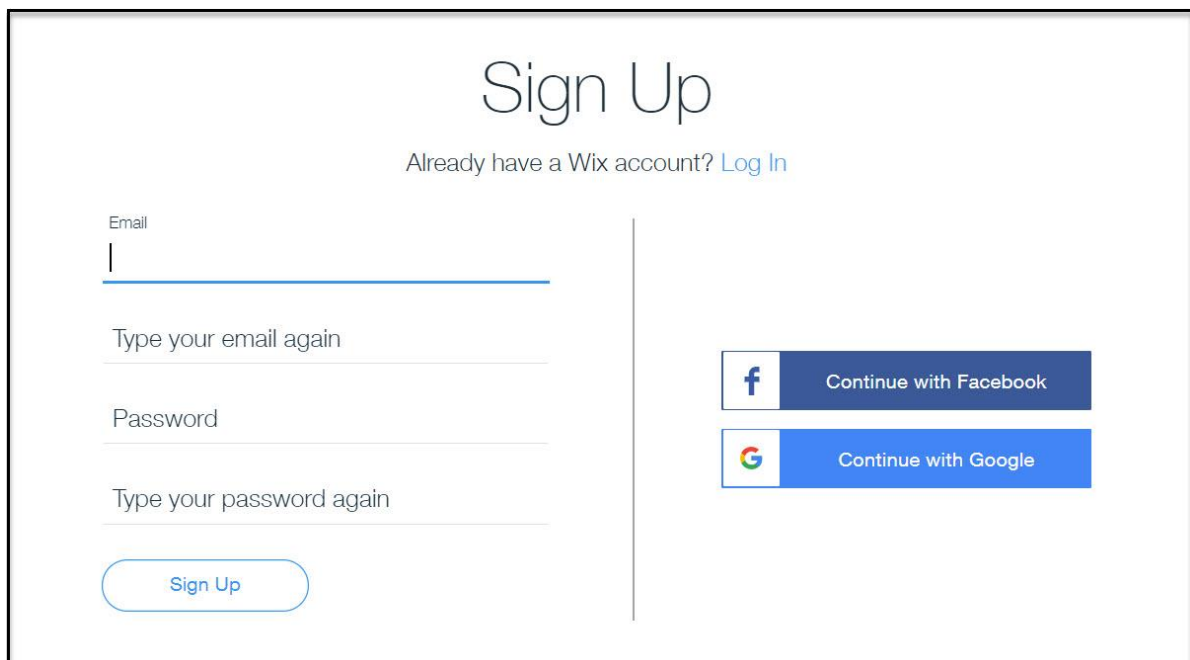

**My website's link is here to check it out [click here](#)**

There are 6 steps involved to build a website on wix.com and those 6 steps are as follow:

- Sign up with Wix
- Use Wix's AI site builder feature
- Select a template that will set your site up for success
- Design and customize your website with the Wix Editor
- Add extra functionality to your site with Wix Apps
- Publish your Wix website to make it live

### **1. Create a Wix account**

To make a website with Wix, you will first need to register for an account. Open the Wix homepage and select **Get Started**. You will then be asked to enter your email address and create an account.

The image shows the Wix 'Sign Up' page. At the top, it says 'Sign Up' in a large font, followed by 'Already have a Wix account? [Log In](#)'. Below this, there are four input fields: 'Email', 'Type your email again', 'Password', and 'Type your password again'. At the bottom left is a 'Sign Up' button. On the right side, there are two buttons for social login: 'Continue with Facebook' and 'Continue with Google'.

After answering a few short questions about your new website, the sign-up process is complete. Next, you will be asked whether you want to create a website within the Wix Editor or let the Wix ADI tool design a website for you...

## 2. Let Wix ADI create a website for you

GET STARTED

# Let Wix ADI Create a Website for You

Answer a few questions and get a website designed for you in minutes, with custom text and images.

[Start Now](#) [Back](#)

Or

Create your own stunning website in the Wix Editor.

[Choose a Template](#)

Although Wix's artificial intelligence designer (ADI) is a useful tool, its design and customization options are limited compared to the Wix templates and editor. Therefore, if you have a basic understanding of website design (and I mean basic),

### Pick your favorite homepage design

You can easily customize your colors, images and more.

My Site

Our Story

Since opening in 2005, My Site has been known for its commitment to customer satisfaction. Our team of experts has helped thousands of people in our industry to grow their businesses. We have the knowledge and experience to help you succeed. Get in touch with us today to learn more about the services and products we provide. Thank you!

you can click here to skip ahead to Step 3 and choose your own template. However, if you are totally new to building a website, then Wix ADI may be a good option for you.

After selecting **Start Now**, the tool will then ask you a few questions about your new project. Make sure you carefully choose the design options that most appeal to you as the ADI tool will design a website based on your answers. Your new website will then open within the ADI Editor.

## Mastering the ADI editor

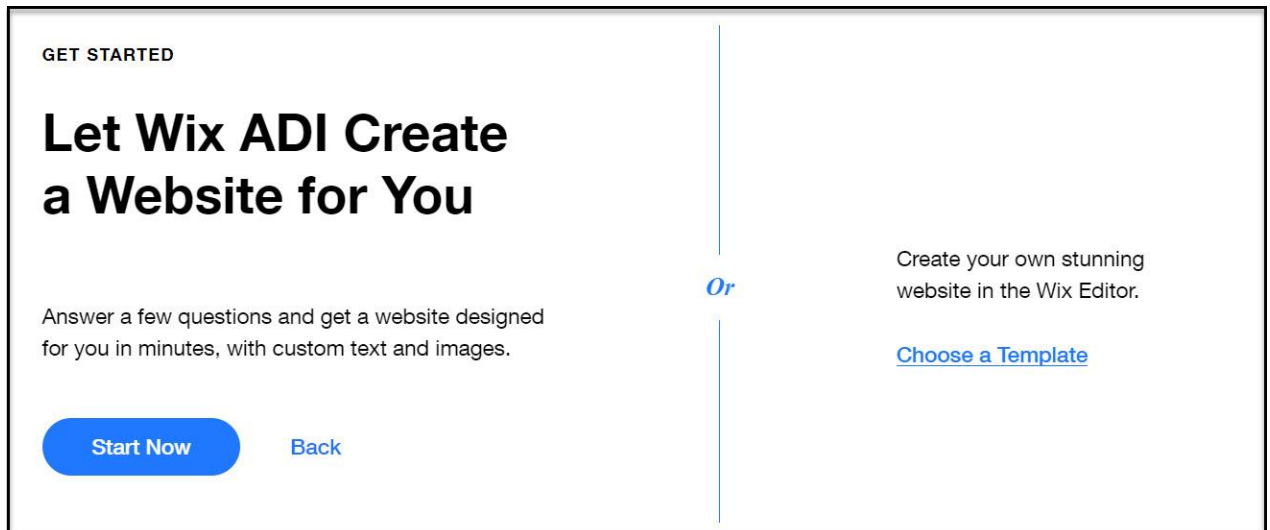

The ADI Editor is easy to navigate. But here are just a few pointers to get you started...

- **Elements** – Click on an element to customize it. The settings for a selected element will appear in the left-hand menu bar where you can then make any necessary alterations. Options include changing the images, writing text, adding buttons, and more.
- **Add a Page** – Select **Pages > Add Page** from the top menu bar. Then select from a range of new page types and pre-made page templates.
- **Design** – Click on **Design** in the top menu to change your website's theme and layout, or alter global colors, fonts, and more.

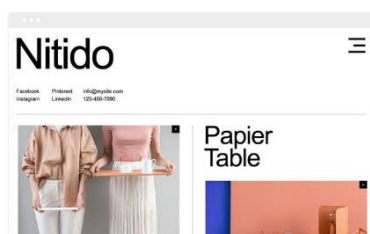

However, if you want more control over your website, you'll be better off skipping the ADI and selecting your own template (*which is my recommended method*).

### 3. Choose a Wix website template

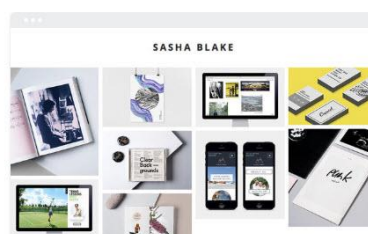

To get started with the Wix Editor, select **Choose a Template**.

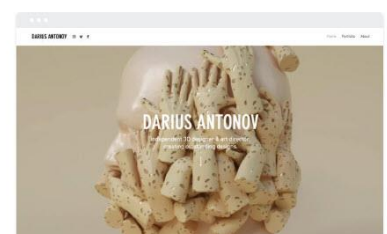

To find designs that match your site, you can filter the templates by category, and you can also **View** each template in demo mode. Once you have found a template that fits with your project, select **Edit**.

Industrial Design Studio

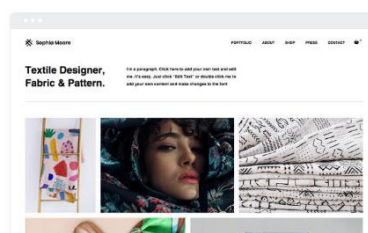

Graphic Design Portfolio

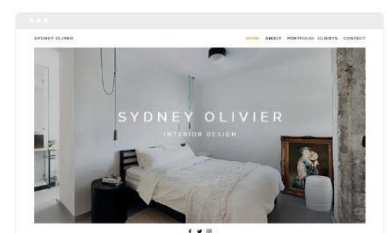

3D Artist

Graffiti Artist

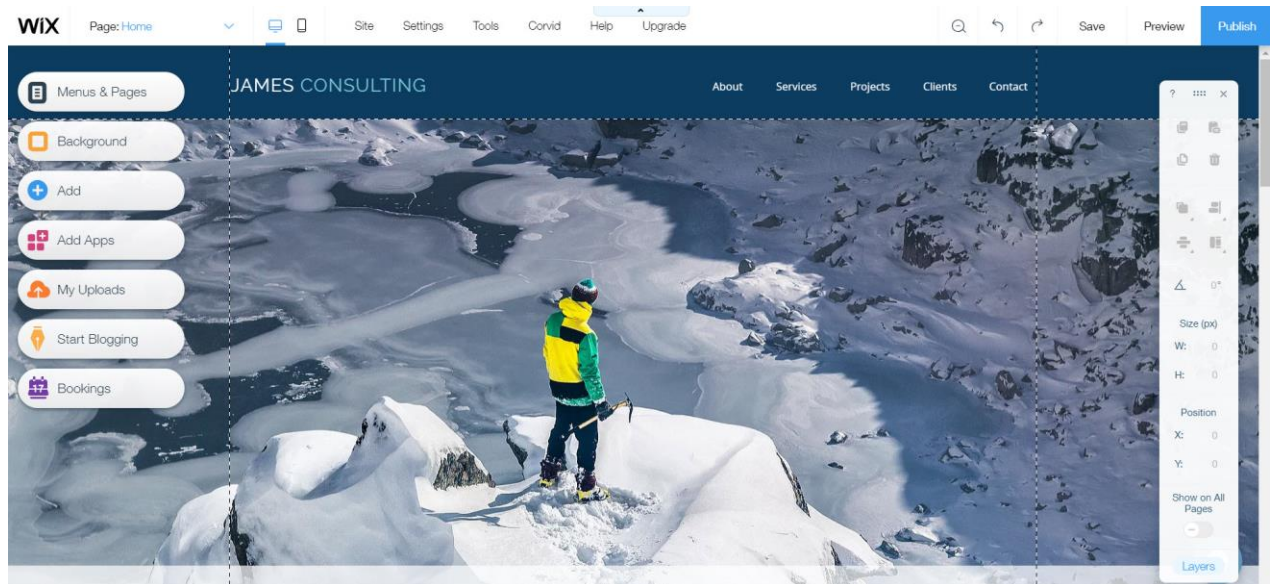

Textile Designer

Interior Designer

#### 4. Customize your website with the Wix Editor

Once you select a template, you'll be able to customize it in the Wix Editor using simple drag-and-drop editing.

To get started, click on an element on the page to alter its settings, resize or reposition it, change colors, rewrite text, and much more. Any changes you make will appear in real-time, so you'll instantly know how your site will look to visitors.

For further customization, you'll use the options in the menu on the left-hand side. Let's go through what you can do here

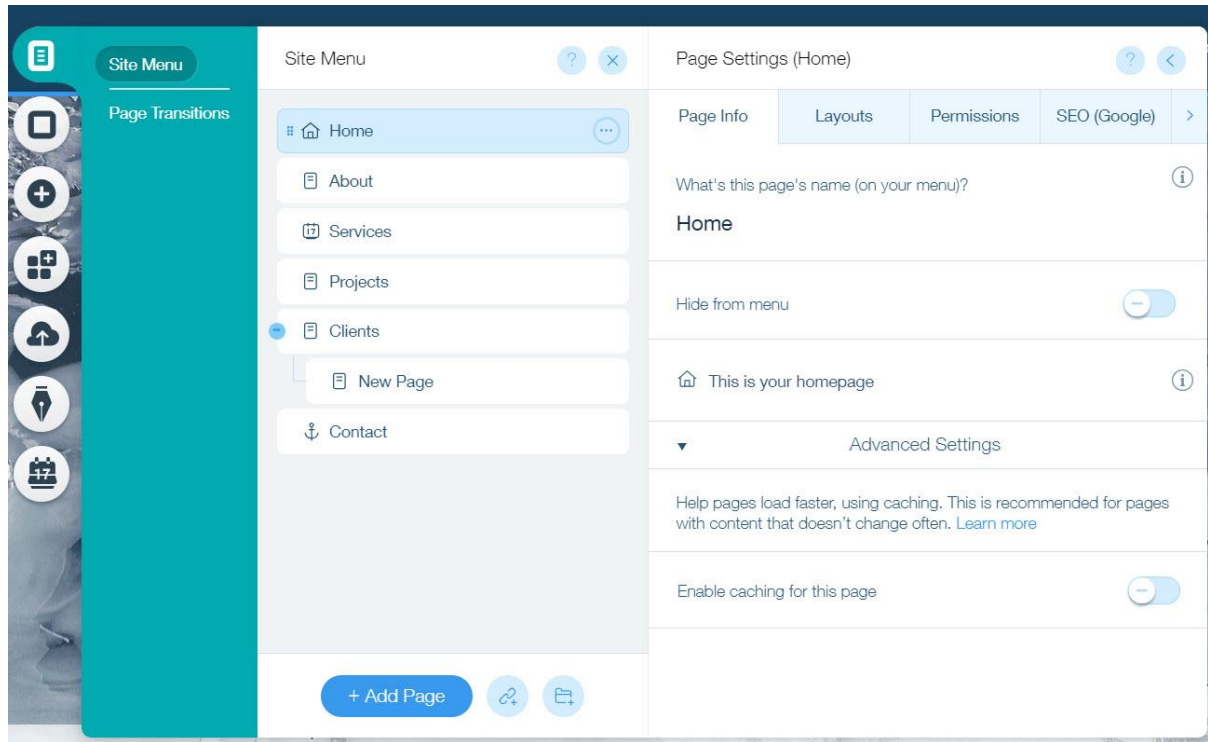

##### **Menus and pages**

Under **Menus and Pages**, you will find your site's pages. Here you can add new pages, as well as rename, hide or delete pages, and change the order that they appear in the menu.

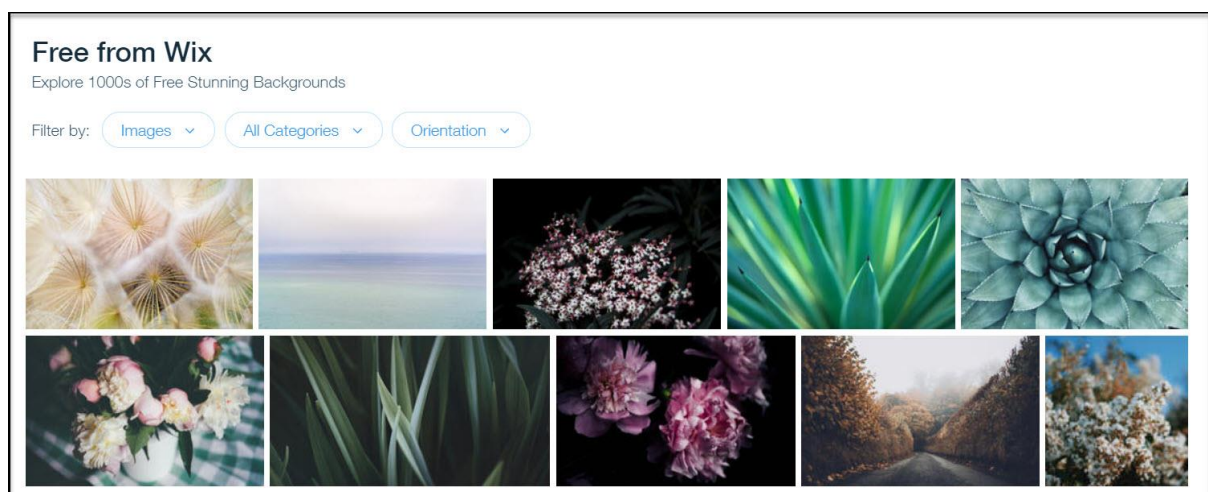

This is also where you can access your pages' **Setting** options, which house a few key options:

- **SEO** – Add metadata to each page to help your content get found in the search engines.
- **Social Share** – Add the images and text that will be displayed when each page is shared on social media.
- **Permissions** – Select who can view each page and create restricted content or members-only pages.

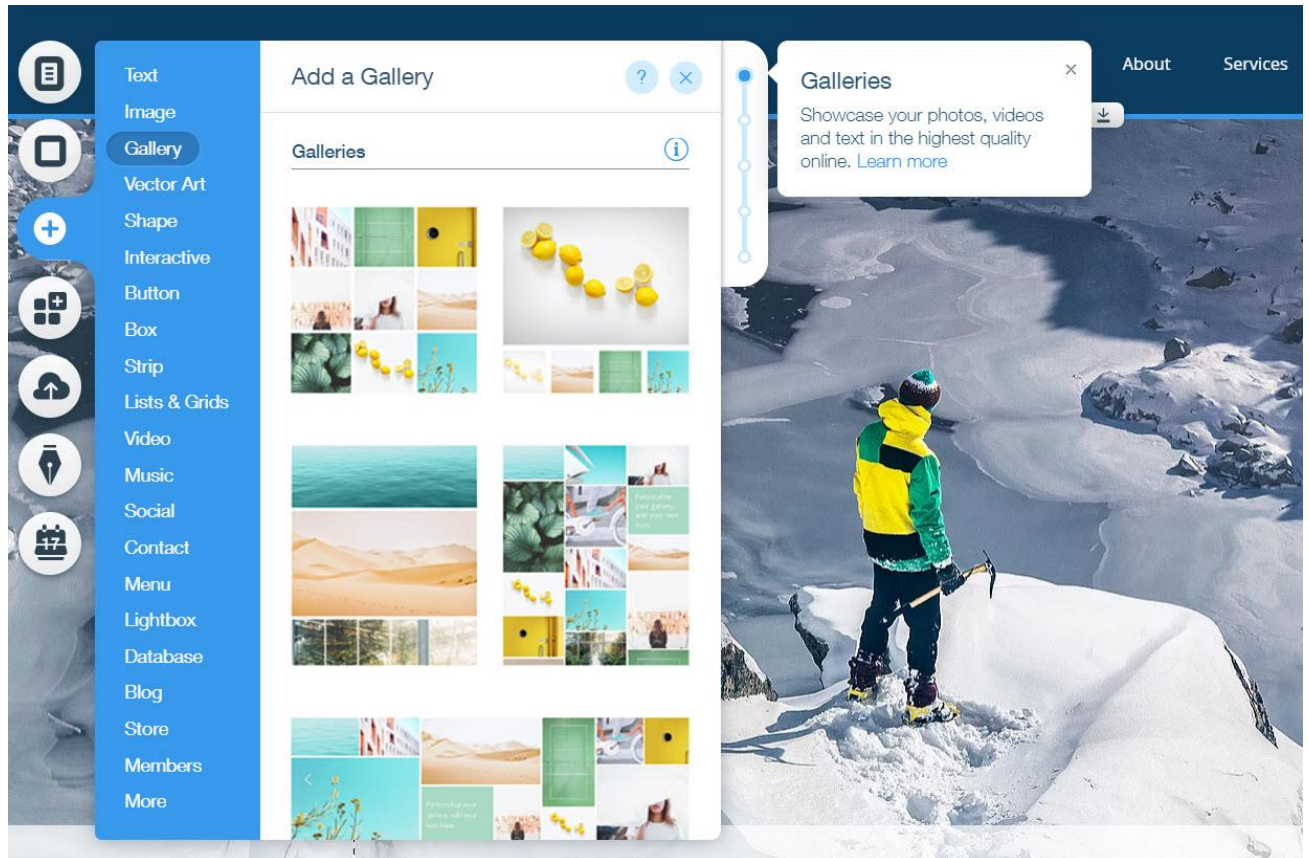

## Background

Wix allows you to change the background color or image, or display a video background. Wix has an extensive free media library to select from or you can upload your own media.

## Elements

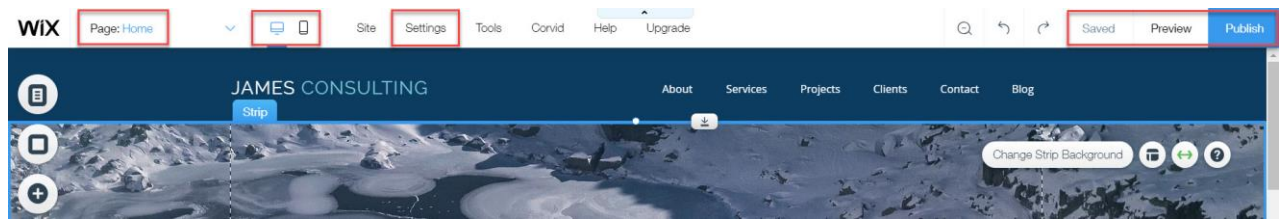

Under **Add**, you can add a wide assortment of elements to your website pages including...

- Galleries and images
- Interactive slideshows
- Videos and music
- Buttons
- Forms

To add an element to your site, drag and drop it in the appropriate place on a page.

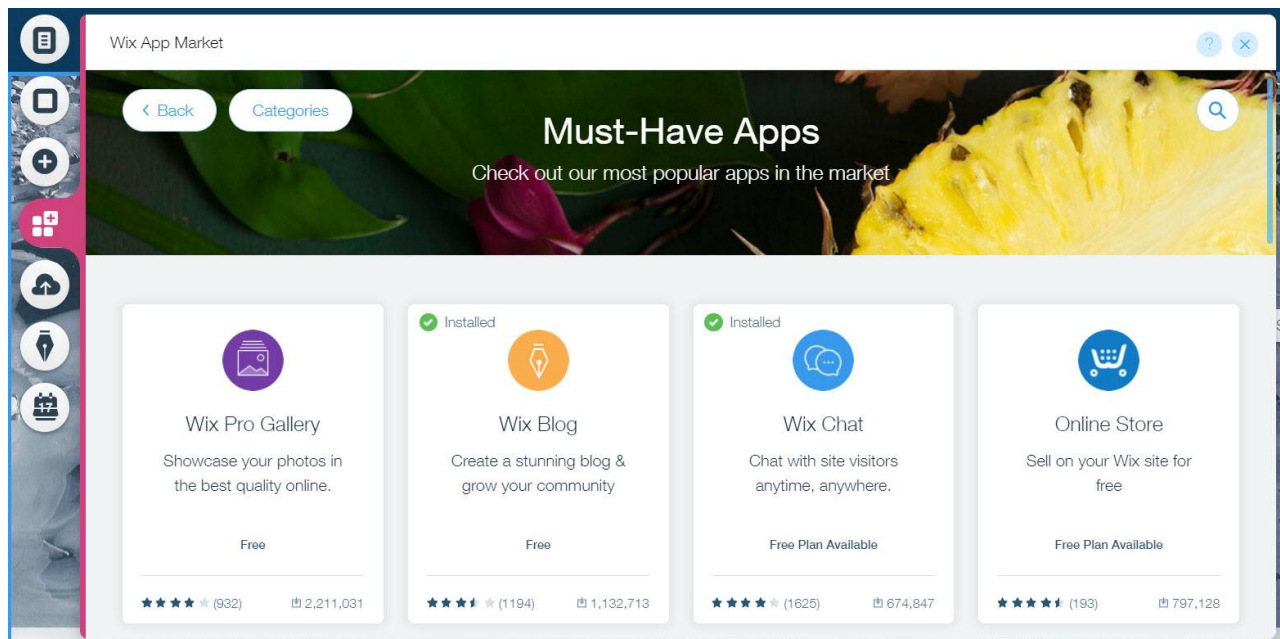

## Top menu

There are a couple of other important Wix Editor features that you can find in the top menu bar. These include.

- **Page** – Quickly toggle between the pages on your site and your blog.
- **Desktop / Mobile** – Switch between desktop and mobile mode to edit your site for both device types.
- **Settings** – Access global settings for your website, add a favicon, view analytics, and much more.
- **Save / Preview / Publish** – It is important to save your website as you go. You can also then preview your site on the front end and publish it when you are ready.

## 5. Use Wix apps to add new functionality

The Wix App Marketplace offers a variety of free and premium apps that can add extra functionality to your website. To access the marketplace, click on the **Apps** icon and then browse the apps to find one that interests you. Here are just a few of the most popular apps currently available.

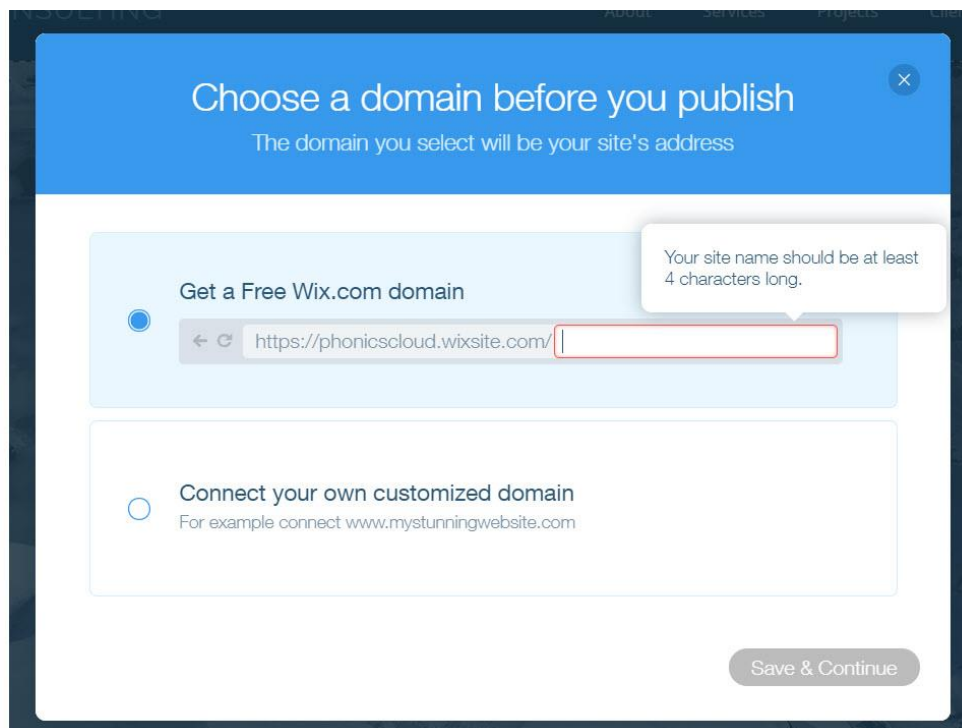

- **Online Store** – Turn your website into an online store with this powerful eCommerce app.
- **Wix Events** – Easily create and manage your events online.
- **Instagram Feed** – Showcase your Instagram images and videos.

To install a free app, open the app's page and click **Add to Site**.

## 6. Publish your Wix website

To make your website publicly accessible, you need to publish it.

To do so, click **Publish** from the top menu. However, before Wix will publish your site, the last step in the process is to create your own subdomain or connect a custom domain. For a serious website, you should definitely connect your own custom domain name, rather than using a Wix subdomain.

The image shows a Wix interface for choosing a domain before publishing. It features a blue header with the text "Choose a domain before you publish" and a subtext "The domain you select will be your site's address". Below this, there are two main options: "Get a Free Wix.com domain" (selected with a blue radio button) and "Connect your own customized domain" (unselected with a white radio button). The first option includes a text input field showing "https://phonicscloud.wixsite.com/" and a tooltip that says "Your site name should be at least 4 characters long." The second option includes a text input field with the example "www.mystunningwebsite.com". A "Save & Continue" button is located at the bottom right.

To use a custom domain, you will need to upgrade your Wix account to a premium plan.

Once you do that, you can publish your site and visitors will be able to access it at whatever domain name you selected.

So here are few screenshots of my website as well as the link of the website.

EXPERTISE

I'M A DEVELOPER

I'm an Android app developer. Its been more than 3.5 years since I started learning Android app development. And during the learning phase, I build various major projects that are in the project section. And also I haveing 8 months of industrial experience in android app development as well.

I'M A YOUTUBER

Youtube is my hobby means creating some knowledgeful videos related to various issues in the country and related to space & tech. I started my YouTube journey in May 2017. And completed 100K subscribers just within a year in June 2018. Currently, on my youtube channel, there are more than 350K subscribers, 34M+ views, 400K+ Likes. And also this channel supports me as financially as well.

I'M AN ANALYST

In 2020 I started my MBA journey and I keen on learning and understanding concepts of finance. That's why I started analysing balance sheets and income statements of various companies on money control. I built lots of comparative analysis of various companies related to hotel industries in India. And applied the various technique of analysis Ratio analysis, Du Pont, Altman Z-score methods.

## ACHIEVEMENT

Actually, there are lots of achievements in every human's life. Similarly, I have so one of the biggest achievement I want to share here that is the silver play button from youtube surpassing 100K+ subscribers on my Youtube channel. I started my youtube channel just as a hobby in May 2017. Initially, I use to upload only graphic effects videos with some data but later on I started voice over on my videos and they go viral. Just within a year, I received this silver play button trophy from youtube on surpassing 100K subscribers. And I'm hoping for the golden play button soon.
